

Analytical Quality by Design - Effizient Arbeiten im HPLC-Labor

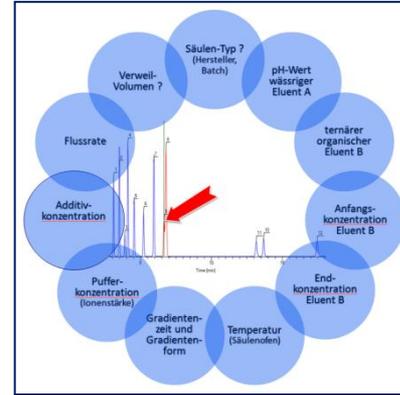

Globale Optimums einer HPLC-Trennung

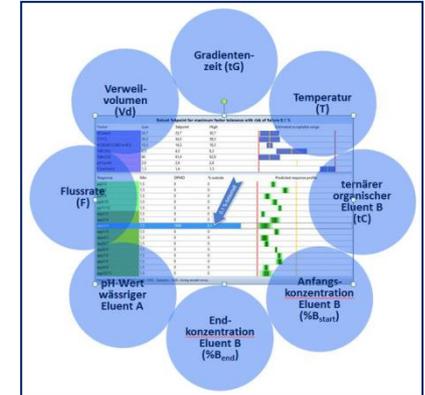

Robuster Arbeitspunkt einer HPLC-Trennung

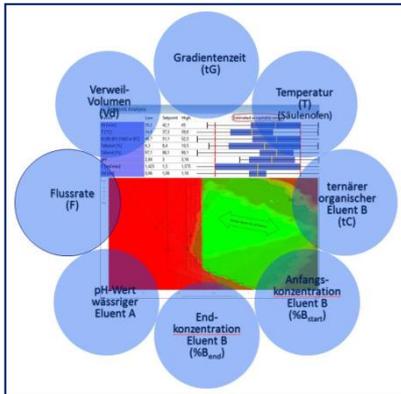

Optimierung einer anfälligen HPLC-Methode

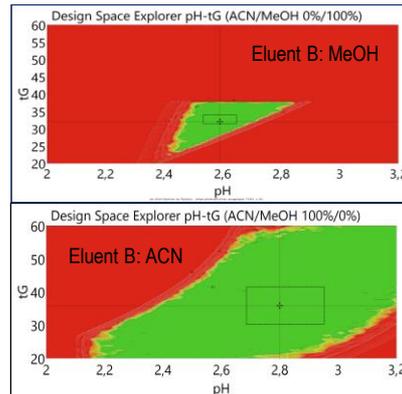

Test einer HPLC-Methode auf Robustheit

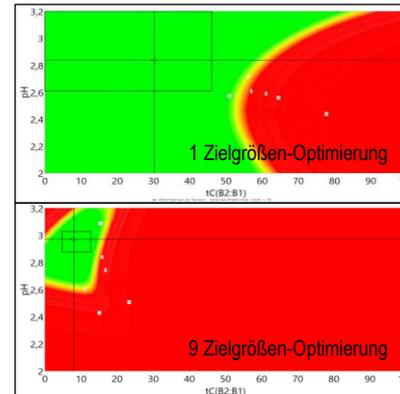

Robuste Faktorbereiche und Visualisierung des Design Space

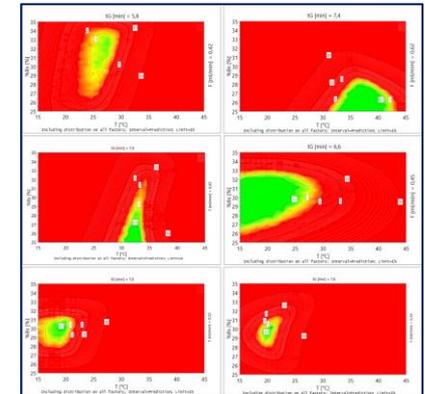

„Grüne“ HPLC – Strategie der nachhaltigen Trennungsoptimierung

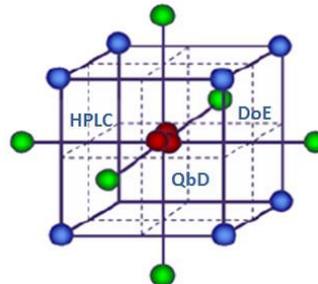

Multi-Faktoren-Modell und Multi-Zielgrößen-Modell

Vergleich von RP-Phasen
